Acknowledgements	11
Preface	13
Introduction	
0.1. Acoustics in teaching pronunciation	17
0.2. Visual information in teaching pronunciation	19
0.3. How to use this book?	22
0.4. What previous knowledge should the readers possess?	22
1. Signal processing	
1.1. The speech signal	23
1.2. Digital signal processing	25
1.3. Hardware	26
1.4. Software	28
1.4.1. Installation	29
1.4.2. Screen panels	30
1.4.3. Operating buttons	31
1.4.4. Setting sample frequency	31
1.4.5. Recording conditions	34
1.4.6. Annotations	36
1.4.7. Cursors and vertical selection	40
1.4.8. Replay	41
1.4.9. Zooming	42
1.4.10. Saving	43

2. The acoustics of speech sounds

2.1. Describing the waveform	49
2.2. Acoustic segments: the building blocks of obstruents	54
2.2.1. Silence	54
2.2.2. Noise	55
2.2.3. Impulse	56
2.2.4. Periodic vibration	58
2.3. Manners of articulation in English obstruents	58
2.3.1. CLOSURE + BURST = voiceless plosive	59
2.3.2. CLOSURE + PHONATION + BURST = voiced plosive	61
2.3.3. CLOSURE + BURST + FRICTION = voiceless affricate	63
2.3.4. CLOSURE + BURST + PHONATION + FRICTION = voiced affricate	64
2.3.5. NOISE = voiceless fricative	66
2.3.6. NOISE + PHONATION = voiced fricative.	67
2.4. Periodic vibrations: vowels and consonantal sonorants	70
2.4.1. Vowels	70
2.4.2. Semivowels vs. diphthongs	76
2.5. Sound vs. segment	78
2.6. Segmentation of the phonetic continuum	79

3. Vowels

3.1. Vowel onset	89
3.2. Vowel quality	97
3.3. Vowel systems	98
3.4. Vowel charts	103
3.5. Substitutions	111
3.5.1. Substitutions of English /ɪ/ by Polish /i/	111
3.5.2. Substitutions of English /e/ by Polish wide /ɛ/	113
3.5.3. Substitutions of English /æ/ by Polish /e/, /ɛ/ or /a/	116
3.5.4. Substitutions of English /ɜ:/ by Polish /ɛ/	118
3.5.5. Substitutions of English /ə/ by Polish /ɛ/	119
3.6. Problems with diphthongs and triphthongs	124
3.6.1. Diphthong span	124
3.6.2. Triphthong smoothing	126
3.7. Intrinsic vowel duration	129

3.7.1. Intrinsic conditioning of vowel duration by the tense-lax distinction	129
3.7.2. Intrinsic conditioning of vowel duration by its degree of opening	132
3.8. Extrinsic conditioning of vowel duration	139
4. Nasals and liquids	
4.1. Quality	145
4.1.1. Nasals	146
4.1.2. The lateral	149
4.1.3. The rhotic	152
4.2. Sonorant duration	156
4.3. Sonorant voicing	158
4.3.1. /l, r, w, j/ following plosives	159
4.3.2. /l/ after voiceless fricatives	162
4.3.3. /r/ after voiceless fricatives	164
4.3.4. /n/ following voiceless obstruents	165
5. Voicing of fricatives and affricates	
5.1. Voicing: an overview	169
5.2. Word-initial position	171
5.2.1. Fricatives	171
5.2.2. Affricates	176
5.3. Word-medial position	179
5.4. Word-final position	182
5.4.1. Utterance-final position	182
5.4.2. Voicing-promoting context in English fricatives	187
5.4.3. Voicing-promoting context in Polish fricatives	189
5.4.4. Voicing-promoting context in English affricates	191
5.4.5. Voicing-promoting context in Polish affricates	193
5.4.6. Voicing-impeding context in English fricatives	196
5.4.7. Voicing-impeding context in English affricates	197

6. Voicing of plosives

6.1. Utterance-initial lenis plosives	201
6.2. Utterance-initial voiceless plosives	208
6.3. Word-initial s + plosive English clusters	216
6.4. Word-final voicing into closure	220
6.5. Lenis stops between two voiced sounds	222

7. Modified plosive release: word-final and in clusters of plosives

7.1. No audible release before a pause	226
7.2. Release in homorganic clusters of plosives vs. their voicing	235
7.2.1. Voiceless homorganic clusters	236
7.2.2. Voiceless + voiced homorganic clusters	238
7.2.3. Voiced homorganic clusters	240
7.2.4. Voiced + voiceless homorganic clusters	244
7.3. Release in non-homorganic clusters	247
7.3.1. Chronological clusters	248
7.3.2. Non-chronological clusters	252

8. Modified plosive release in clusters of plosives with other consonants

8.1. Plosives + affricates	261
8.2. Plosives + nasals	266
8.2.1. Homorganic nasal release	266
8.2.2. Non-homorganic nasal release	269
8.3. Glottaling in place of nasal release	271
8.4. Plosive + lateral	273
8.4.1. True (homorganic) lateral release	273
8.4.2. Non-homorganic lateral release	275
8.5. The “rhotic release”	276
8.6. /t, d/ before interdental fricatives	278
8.7. Clusters of three plosives	280
8.8. Affrication and weakening	282

9. Place of articulation of fricatives and affricates

9.1. Noise: An overview	289
9.2. Focus on /θ, ð/	294
9.3. Focus on /h/	298
9.4. Focus on /ʃ, ʒ, tʃ, dʒ/	299

10. Synthetic exercises in reading spectrograms

Set 1. Numerals 1–10	304
Set 2. Seven days of the week	309
Set 3. Twelve names of the months	313
Set 4. Twenty famous English personae	319
Set 5. Three famous English quotations	329
Set 6. Three ordinary English utterances	341
Keys to selected activities and exercises	350
Key to Activity 2	350
Key to Set 1	350
Key to Set 2	351
Key to Set 3	351
Key to Set 4	351

Readers' feedback	353
References	355
